50X1-HUM

COUNTRY	Hungary	REPORT	
SUBJECT	Observation of Missiles and Mobile Launchers at Soviet Military Installation in Budapest (O.C.R.)	DATE DISTR.	5 04 1981
		NO. PAGES	2
		REFERENCES	RD

DATE OF INFO.		50X1-HUM
PLACE & DATE ACQ.		

THIS IS UNEVALUATED INFORMATION. SOURCE GRADINGS ARE DEFINITIVE. APPRAISAL OF CONTENT IS TENTATIVE.

1. [redacted] a Soviet military installation [redacted] is located at approximately No. 240 Üllői út (Vöröshadsereg út), on the south 50X1-HUM of the street across from Ferihegy airport.¹ It is situated on a hill about 20 meters above the level of the street.

2. [redacted] inside the installation [redacted] 50X1-HUM
[redacted] a shed housing an unspecified number of trailers each of which was loaded with what appeared to be a missile wrapped in protective canvas. The canvas adhered to the missile showing its outline as a cylinder of unvarying diameter. The cone was tapered and geometrically proportioned to the cylindrical body of the missile. The stern end had protrusions which appeared to be stabilizing fins. The missiles were 7 to 8 meters long and approximately 60 to 80 centimeters in diameter. 50X1-HUM
3. Parked in the same shed with the trailers and missiles were an unspecified number of half-tracked vehicles and three-axle trucks, both equipped with launching ramps.

CONFIDENTIAL

NOFORN

SUBJECT: USSR - Hungary

50X1-HUM
50X1-HUM

Undetermined Soviet mobile unit armed with missiles and
stationed in Budapest.

1. This unit has been stationed here since after the autumn of 1956;
the year is undetermined.

2. Quarters

In a barracks constructed since World War II, which has always been
occupied by Soviet troops.

It stands on a hill, which hill is about 20 meters above the level
of the ÜLLÖI UT.

It is situated on the southern side of the ÜLLÖI UT, across from
FERIHEGY airport; it is ~~about even with~~ street address No 240 on
the above mentioned street.

3. Description of the barracks

(The numbers are keyed to those used on attached sketch No 1 in this
report).

The barracks occupies a square area with 500 meter sides. It is
enclosed by a wire fence ~~which is stretched~~ on concrete poles.

CONFIDENTIAL

NOFORN

CONFIDENTIAL

NOFORN

1 Cultivated fields ~~which grow~~ low vegetation surround it.

- 1) The entrance, ~~is about 200 meters from~~ No. 240 on ULLÖI UT.
- 2) ~~mess.~~ Guard office.
- 3) Garage and motor vehicle shop.

Masonry shed with tiled roof ~~and~~ covering an area of 20 x 200 meters.

- 4) An open parking area within ^h which trucks, trailers, radio ^{trucks} ~~cars~~, radar ^{trucks} ~~cars~~ and mobile power units are parked.

- 5) An anti-air craft radar ^{truck} ~~car~~ in the open

resembling the one in figure No 2

50X1-HUM

- 6) As above.
- 7) Three groups of tents.

Each group occupies an area of about 50 x 100 meters. The tents have the dimensions of 3 x 4 meters.

- 8) A shed closed on three sides, with a ^{single peaked} ~~single peaked~~ roof of Eternit. Dimensions: 25 x 200 meters.

The trailers for the transportation of missiles and the vehicles carrying the ramps are garaged here.

- 9) Kitchen.

50X1-HUM

- 10) ^{Mess hall} ~~Mess hall~~ measuring 40 x 100 meters.

- 11) Shed

- 12) Officers quarters - 1 structure

- 13) Quarters for officers with families - 2 structures.

CONFIDENTIAL

NOFORN

CONFIDENTIAL

NOFORN

- 14) A three-story building, including the ground floor; It has approximate dimensions of 20 x 150 meters.

The unit headquarters is in this building, ~~and~~ ^{with} other ~~buildings~~.

- 15) Barracks parade grounds.

- 16) Route from the entrance to the kitchen.

50X1-HUM

- 17) Route to go from the kitchen to the garage, to pick up some oxygen bottles.

- 18) Route to exit from the barracks.

50X1-HUM

4. Commanding Officer

Of unknown rank.

50X1-HUM

5. Strength

About 2,000 liters of soup are prepared for each meal.

6. Known characteristics of the missiles observed

Type of employment: undetermined

Number of stages: undetermined

Shape: they are laid in a horizontal position on a trailer (1 to each trailer) of two ~~axles~~ ^{axles}, with twin wheels.

They are wrapped in ~~adhering~~ ^{protective canvas} to the missile, showing its silhouette as a cylinder of ~~small~~ ^{medium} diameter.

The cone is ~~streamlined~~ ^{streamlined} and geometrically proportioned to the cylindrical body of the missile.

The stern end had protrusions which led one to believe that they were

CONFIDENTIAL

NOFORN

CONFIDENTIAL **NOFORN**

stabilizing fins.

Length: 7 - 8 meters

Diameter: Judged to be 60 - 80 centimeters approximately.

The number of trailers loaded with missiles of the type described is unknown.

They were parked in the shed mentioned in number 8 of attached sketch number 1.

(See attached sketch Number 2 of this report which pictures the approximate silhouette of the trailers and the missile described above).

7. Mobile ramps

In the same shed mentioned in 8 of the attached sketch Number 1 ~~there~~ they were parked:

Half-tracked vehicles, with the tracks having a width of about ~~87~~ 80 centimeters ~~and being~~ of two types: The first type has ~~a~~ ^{normal} place for the transportation of personnel; the second type is equipped with a ramp which is padded with canvas. The silhouette leads one to estimate that there ~~is a plate~~ ^{is a plate} of 50 - 60 centimeters thickness. ~~The~~ dimensions are undetermined. ^{longitudinal plates are} The sides of the half-tracks ~~have~~ ^(in ferro) two ~~longitudinal~~ steel plates which jut perpendicularly from the extreme sides of the ramp, travelling on the tracks, so that they appear ~~as~~ ^{to be} foot walks for the servers. They are 40 - 50 centimeters wide. (See attached ~~next~~ ^{sketch} number 3 of this report which pictures the approximate silhouette of this type of half-track).

CONFIDENTIAL **NOFORN**

CONFIDENTIAL

NOFORN

There were also parked in the same shed, 3-^{axle}~~axle~~ trucks on which there was a ramp similar to those installed on the half-tracks.

Length: Extended beyond the driver's cab, almost as far as a perpendicular line of the radiator;

Width: A little narrower than the body ~~plane~~ because these vehicles also have ~~rampers or~~ foot-walks on the sides;

Thickness: About 30 centimeters.

The ramps on these trucks were also padded with canvas. (See attached sketch Number 3 of this report which pictures the approximate silhouette of this type of truck on three ^{axles}~~axels~~ with ramp).

The trailers loaded with missiles and the vehicles having ramps were parked ^{side by side along}~~lengthwise in~~ the shed but it was not possible to determine whether they were in one or more rows.

8. Radar, radio and electronic gear noted

In the shed - garage mentioned in Number 3 of the sketch, ^{document}~~of the~~

~~barracks attached~~ Number 1 to this report, there were parked:

radio and radar ~~cars~~; the radar ~~cars~~ were identified

50X1-HUM

as being the one ~~for those~~ in

50X1-HUM

figure 14 or figure 15 of CRITS/5/RAD, that is, anti^{air}craft

target ^{locatar}~~acquisition~~ radar^{for}

Two AA fire control radar^{per artiglieria (i.e.)} parked in the barracks yard (see

Number 5 and 6 of attached sketch Number 1 in this report) and

they were recognized as being like those in figure

50X1-HUM
